

Site Plan Checklist
Town of Windsor

41. Energy Conservation

In order to provide efficient use and generation of energy, the use of alternative energy, energy efficient building and home products is encouraged. Check off any of the following items you have considered and/or demonstrated in your plan.

- Photovoltaic cells
- Geo-thermal
- Rooftop garden
- Motion detectors for indoor/outdoor lighting
- Timer and rain sensor for lawn irrigation system
- Rainwater recapture system for lawn irrigation
- LEEDS certification (bronze, silver, gold, platinum)

Building Products including but not limited to:

- Composite decking material
- Recycled roofing shingles
- Insulation (>R30 or Icynene®)
- Recycled plastic lumber or Preserve® treated
- Recycled fiberboard products
- Recycled vinyl flooring
- Recycled carpeting
- Skylights
- On-demand hot water heater
- Solar powered attic fan with high-temperature shut off
- Energy Star rated appliances

Use of items must comply with zoning regulations in effect at the time of application.
